Using the Galaxy Planetarium

1. Place base on a flat surface such as a bedside table.
2. Screw the klips into the socket and then remove the battery door cover. Insert 4 size (LR-6, 1.5V) batteries or with 6V-500mA AC adaptor.

Bulb Replacement:

1. Remove the old bulb and replace it with a new 6V 150mA bulb. This should be done by an adult.

Batteries should only be replaced by adult. Otherwise the batteries may leak and cause damage.

Batteries should not be mixed together so they would not get separated.

Your Galaxy Planetarium can also be used as a personal night-light and music player etc). Your audio device can be connected to the Galaxy Planetarium through the Audio-In jack with the patch cable (provided).

Learn more about the 12 signs of the Zodiac

Aries is the first constellation of the zodiac, and the ancient Babylonians, associated it with the ram, Aries, which is represented by a horned head with a beard of flame.

The zodiac has always been associated with numbers. In most ancient cultures, the 12 signs of the zodiac were considered to be equal.

The sign of Cancer is associated with the crab. The crab is a symbol of strength and power. It is also a symbol of family and home.

The zodiac signs are all based on the position of the sun and the planets in the sky on the day a person is born. This is called astrology.

Have fun learning all about the stars!

Throughout history, the planets have been attributed with many mystical powers. The Greeks and Romans named them after their Gods.

Every day there are many people who believe that the personality of a person and his future are determined by the position of the planets and stars at his birth.

This is called astrology. The word is from the Greek meaning the “science of the stars.” Thousands of years ago astrology was used to determine when to plant and harvest crops. At a later date, this developed into the idea that you might be able to tell the future by the position of the stars and planets in relation to the sun. Astrologers maintain that everyone is born under a zodiac sign that is determined by the position of the sun and the planets in the sky on the day a person is born. The world “zodiac” means “circle of life”, as most of the zodiac signs are animals or people. The zodiac signs are used in horoscopes, which are predictions about the future. Some people believe that they can tell the future from their horoscopes.

The word “horoscope” comes from the Greek word “horoskopos,” which means “sky chart”. This is a collection of celestial objects, usually stars or planets, which are used to make predictions about the future.

There are 12 zodiac signs: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces.

Imagine your room transformed into a galaxy of luminous star light. Your Galaxy Planetarium projects a spectacular ambient display of stars and constellations on soft white glowing yellow and green light. While projecting star space onto your ceiling and walls, listen to the pre-recorded soundtrack of educational space facts and soothing space sounds.

2. For Red-dot Star Pointer

1. Use the pointer head to aid in children and it is inserted with 2 size AA (LR-6) 1.5V batteries.

3. Replace the pointer head and screw it back into place.

4. For Red-dot Star Pointer

1. Use the battery cover and screw it back into place.

5. For Galaxy Planetarium

1. Unplow the battery door cover with a Phillips screwdriver and insert 4 size AA (LR-6) 1.5V batteries.

6. For Red-dot Star Pointer

1. Unplow the battery cover and screw it back into place.

7. Accessory:

• Dual Power Operation – powered by battery (not included) or AC Adapter (Optional – not included).
• Built-in Audio Speaker
• Audio In Input Jack and Audio Cable – features Audio-R (Jack so you can play music or sounds from your personal audio device (radio, MP3, iPod, cassette player etc)). Your audio device can be connected to the Galaxy Planetarium by means of the included audio cable.
• Integrated Soundtrack – space facts and ambient sounds.
• Red dot Star Pointer – for identifying the stars and constellations that are moving across the room.

8. Features:

• Two Light Modes – white light or yellow/green color-change mode.
• Usb Interface Operation – powered by battery (not included) or AC Adapter (Optional – not included).
• Built-in Audio Speaker
• Audio In Input Jack and Audio Cable – features Audio-R (Jack so you can play music or sounds from your personal audio device (radio, MP3, iPod, cassette player etc)). Your audio device can be connected to the Galaxy Planetarium by means of the included audio cable.
• Integrated Soundtrack – space facts and ambient sounds.
• Red dot Star Pointer – for identifying the stars and constellations that are moving across the room.
